JIPB Workshop on Scientific Writing 2016

(Second announcement)

Scientific papers, which act as the central means of communication for researchers in connection with their community, are essential for the progress of scientific development. Indeed, the value of clear and effective communication within the scientific community through the dialogue of scientific journals has never been more apparent as local Chinese research and publications are increasingly cited on an international scale. However, in considering research aimed at international journals, reviewers are also becoming more and more concerned with not only the high quality of the submission's scientific content, but also the quality of its writing. As the competition increases, to secure publication in a high-ranking journal only the most succinct, language-sufficient, and logically crafted articles will suffice.

To match the demand, the *Journal of Integrative Plant Biology* (JIPB) will hold a workshop on scientific writing as a part of a series of workshops held by JIPB. The speaker, Prof. William J. Lucas from California University, Davis, is renowned for his passion for teaching young students and for his highly informative speeches. He will outline the rules of scientific writing to allow the audience to gain clear insight into the lengthy process of scientific paper writing, then help teach students how to plan and prepare accordingly.

All plant biology researchers, graduate students, undergraduate students and editorial staff are welcome to join in the workshop and each audience member will receive a certificate at the end of the workshop commemorating their participation.

1. Organizers : *Journal of Integrative Plant Biology* **Editor-in-Chief:** Prof. Chun-Ming Liu

Brief Introduction of JIPB

JIPB is a peer-reviewed monthly journal that reports the latest plant biology discoveries. It was first established in 1952 as *Acta Botanica Sinica* by the Botanical Society of China and the Institute of Botany, Chinese Academy of Sciences (CAS). In 2005, its name was changed to the *Journal of Integrative Plant Biology*. The journal publishes 5 types of articles: commentaries, invited expert reviews, letters to the editor, new technologies, and full-length research articles.

JIPB's 5-year impact factor is 3.993 and 2-year impact factor is 3.67. Among 209 SCI-listed plant science journals worldwide, JIPB ranks 24th. As one of the top-10 international journals published in all disciplines from China, the journal is currently accessible in 15,200 institutions worldwide and is indexed by 67 international databases including PubMed, SCI, Google Scholar, CA, BA and BIOSIS. All articles published since 1952 are available in our website (www.jipb.net).
