

## 生态草牧业系列讲座 第1期

Cross-scale modelling of cropping systems  
from gene/genome to landscape in era of big data

报告人: **Enli Wang, Chief Research Scientist**

时 间: 2024年7月22日 (星期一) 10:00

地 点: 丁香楼报告厅

联系人: 景海春研究员 (hcjing@ibcas.ac.cn)

Dr Enli Wang is a Chief Research Scientist at CSIRO in Canberra, Australia. He is currently leading the Crop Modelling Team in CSIRO and is the leader of the canola modelling team in the international Agricultural Modelling Improvement and Intercomparison Program (AgMIP). He was a former Editor-in-Chief of the international journal of Field Crops Research (Elsevier) and is an editorial board member of the Journal of Integrative Agriculture. He is an invited reviewer by leading international scientific journals, e.g. Nature Climate Change, Nature Plants, Global Change Biology, New Phytologist etc.

Enli has >30 years of experience in soil-plant systems modelling research and has been the Principal Investigator of multiple internally and externally funded national and international research projects. The key areas of his research include: GxExM modelling, Agro-Ecosystem Eco-Efficiency, Carbon & nutrient cycling, Soil Inverse Modelling, Climate Forecast & Change.
