报告人简介

Alice Hughes is associate professor of School of Biological Sciences, the University of Hong Kong. She is a conservation biologist based in Asia. Her research aims to understand patterns of biodiversity and drivers of biodiversity change, to inform more rigorous & appropriate conservation. She is a wide-ranging and highly active researcher with 150+ publications around multiple aspects of biodiversity patterns, drivers, technical means of conservation, actions, and policies, and holds board positions in 7 ecological societies and 2 NGOs to promote scientific exchange and implementation of conservation science. She is engaged in promoting the implementation of the Kunming-Montreal Global Biodiversity Framework by ensuring that policy reflects the best of biodiversity science and working on communicating conservation standards and tools on a regional and global basis.
